The  
ANSWER!

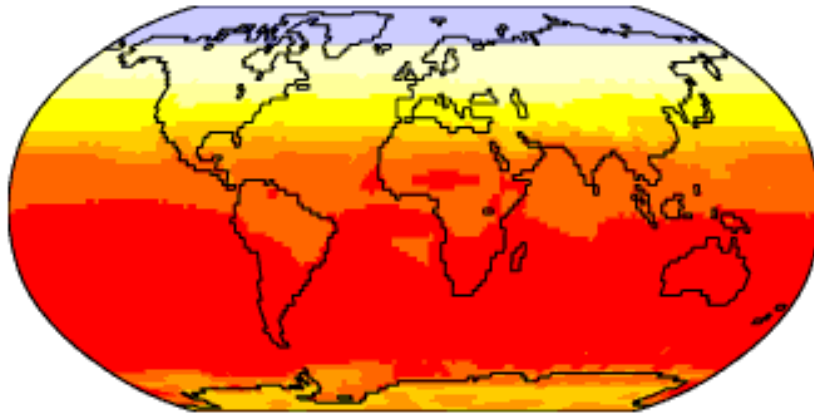

# #10 How Climate Works Part II

## HOW IT ALL FITS TOGETHER:

- **INCOMING SOLAR SW** (Insolation) varies by latitude (*more comes in near the equator, less near the poles*)
- **OUTGOING TERRESTRIAL LW** radiation varies by latitude *too* (*more LW emitted at warmer tropical latitudes, less in the cooler high latitudes*)
- The **EQUATOR–POLE DIFFERENCES** in how much LW radiates out are not as great as the equator-pole differences in how much SW comes in. Hence more comes in than goes out at the low latitudes and more goes out than comes in at the high latitudes.
- The result is a **NET SURPLUS** of energy in the low latitudes and a **NET DEFICIT** in the high latitudes.
- This energy imbalance leads to large **THERMAL DIFFERENCES** between low and high latitudes that drive the **GENERAL CIRCULATION OF THE ATMOSPHERE**, which moves surplus energy from the tropics to the deficit areas in the colder latitudes via **SENSIBLE HEAT (H)** and **LATENT HEAT (LE)** transport of energy.

Short-Wave Radiation

Dec

Absorbed solar energy

Net Radiation  $R_{NET}$

Long-Wave Radiation

Emitted infrared energy

Data: NCEP/NCAR Reanalysis Project, 1959-1997 Climatologies  
 Animation: Department of Geography, University of Oregon, March 2000

The result is a **NET SURPLUS** of energy in the low latitudes & a **NET DEFICIT** in the high latitudes

The EQUATOR-POLE  
DIFFERENCES of what  
goes OUT from the  
EARTH

*are less than the*

EQUATOR-POLE  
DIFFERENCES of what  
comes IN from the SUN

**POLE**

**EQUATOR**

**HADLEY CELL TRANSPORT**

**HADLEY CELL TRANSPORT**

**BOTH CIRCULATION MECHANISMS ARE NEEDED!**

**ROSSBY WAVE TRANSPORT**

# WHAT ABOUT OCEAN CIRCULATION?

→ Large OCEAN GYRES are driven by Trade Winds & Westerly Winds in Oceanic Subtropical High Pressure Cells

Leads to SURFACE ocean currents

# OCEAN CIRCULATION - SIMPLIFIED

# Both **ATMOSPHERE** & **OCEAN** play important roles in **BALANCING OUT ENERGY SURPLUS & DEFICIT AREAS**:

**OCEAN** transports **MOST** of the energy in **LOW** → subtropical latitudes

**ATMOSPHERE** more important in mid → high latitudes

Poleward transport of energy in N.H.

ENERGY is transported from areas of surplus to deficit via

# Warm Air transport : H (sensible heat)

# & LE (Latent Energy) transport

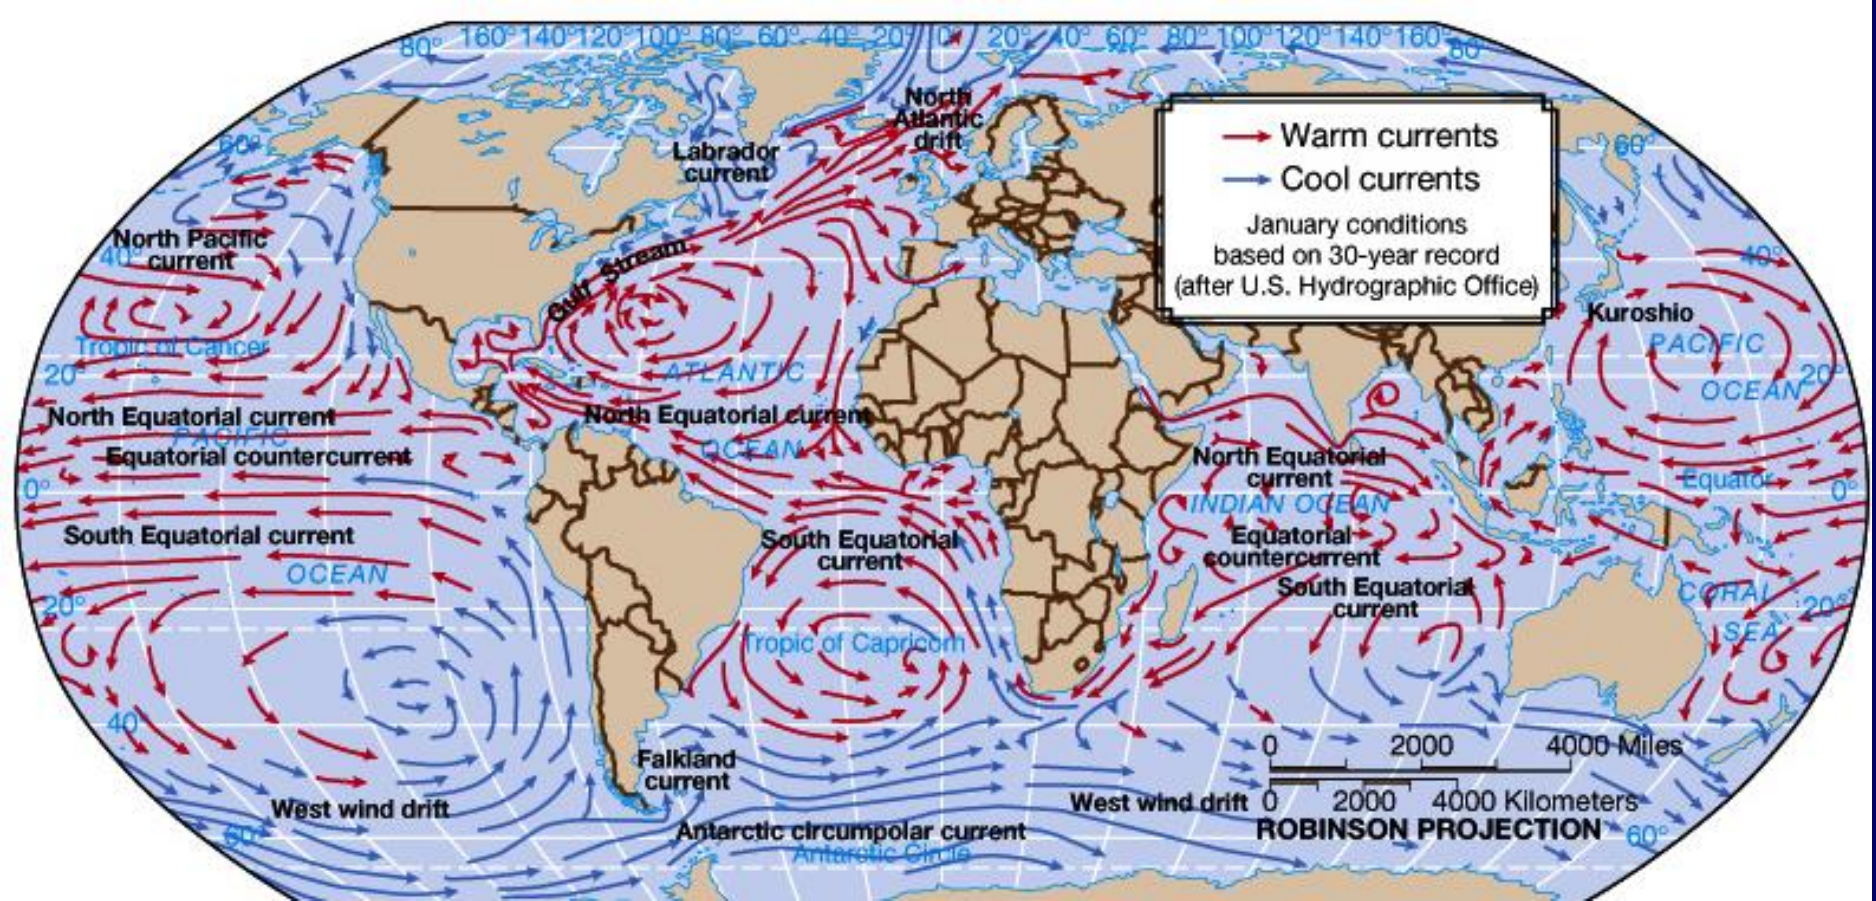

**H + LE**

# ENERGY TRANSFER IN THE OCEAN

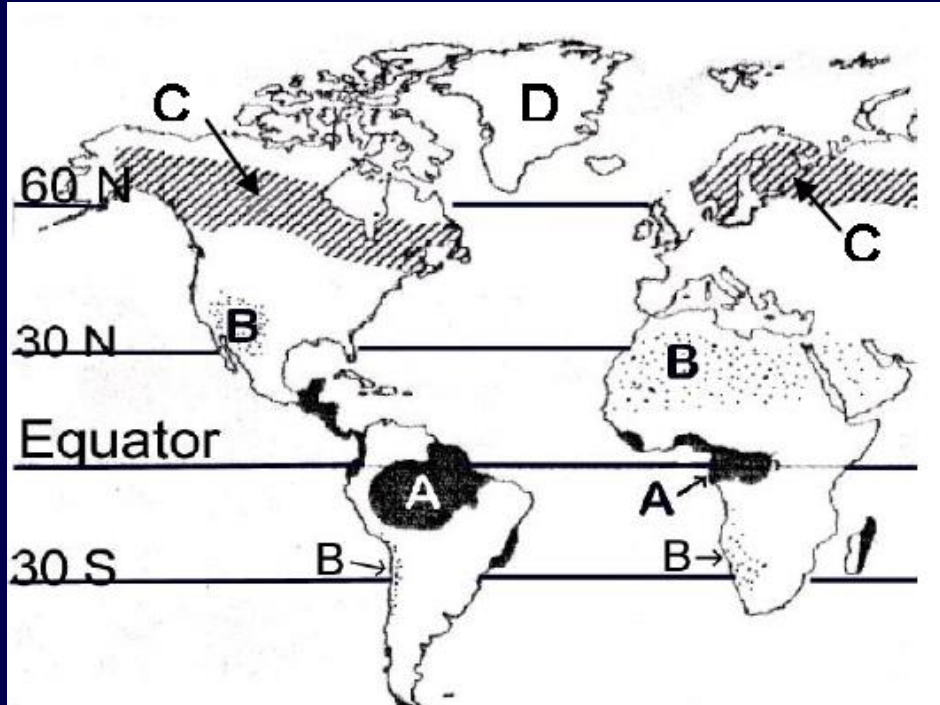

$$H + LE + G$$

Energy stored in the OCEAN (as **G**), can later be transported via ocean currents as **H**!

**Q's. What kind of climate and vegetation will you find in the areas marked A, B, C, & D ?**

**Area A = \_\_\_\_\_**

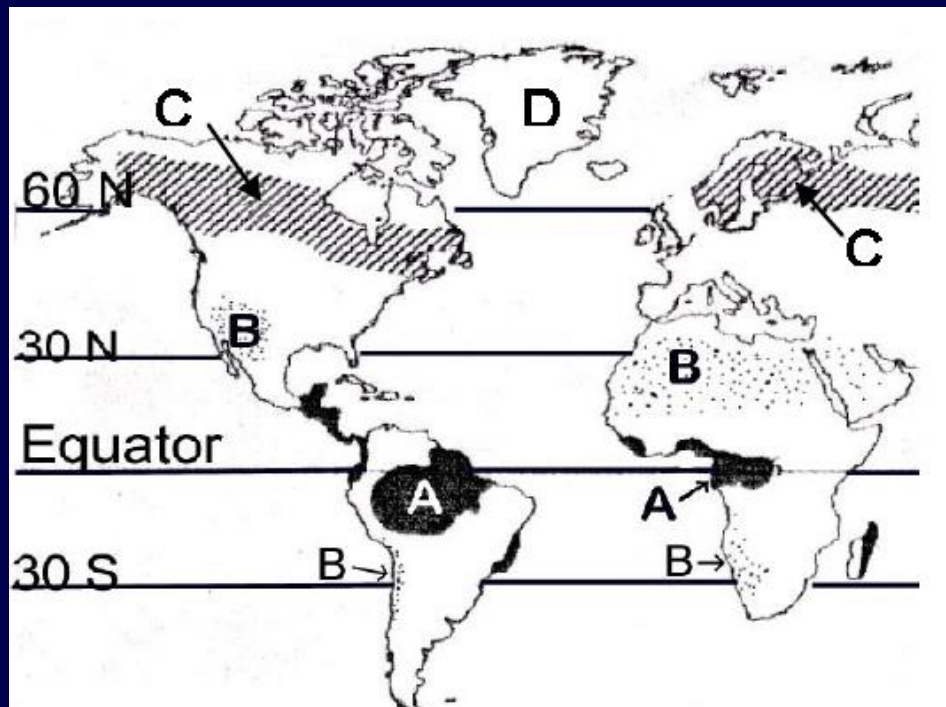

**Area B = \_\_\_\_\_**

**Area C = \_\_\_\_\_**

**Area D = \_\_\_\_\_**

- 1-Tropical Forest**
- 2 -Conifer Forest**
- 3- Warm Desert vegetation**
- 4 -No vegetation: snow and ice**

**Q's. What kind of climate and vegetation will you find in the areas marked A, B , C, & D ?**

**ANSWERS:**

**Area A = 1**

**Area B = 3**

**Area C = 2**

**Area D = 4**

**1-Tropical Forest**

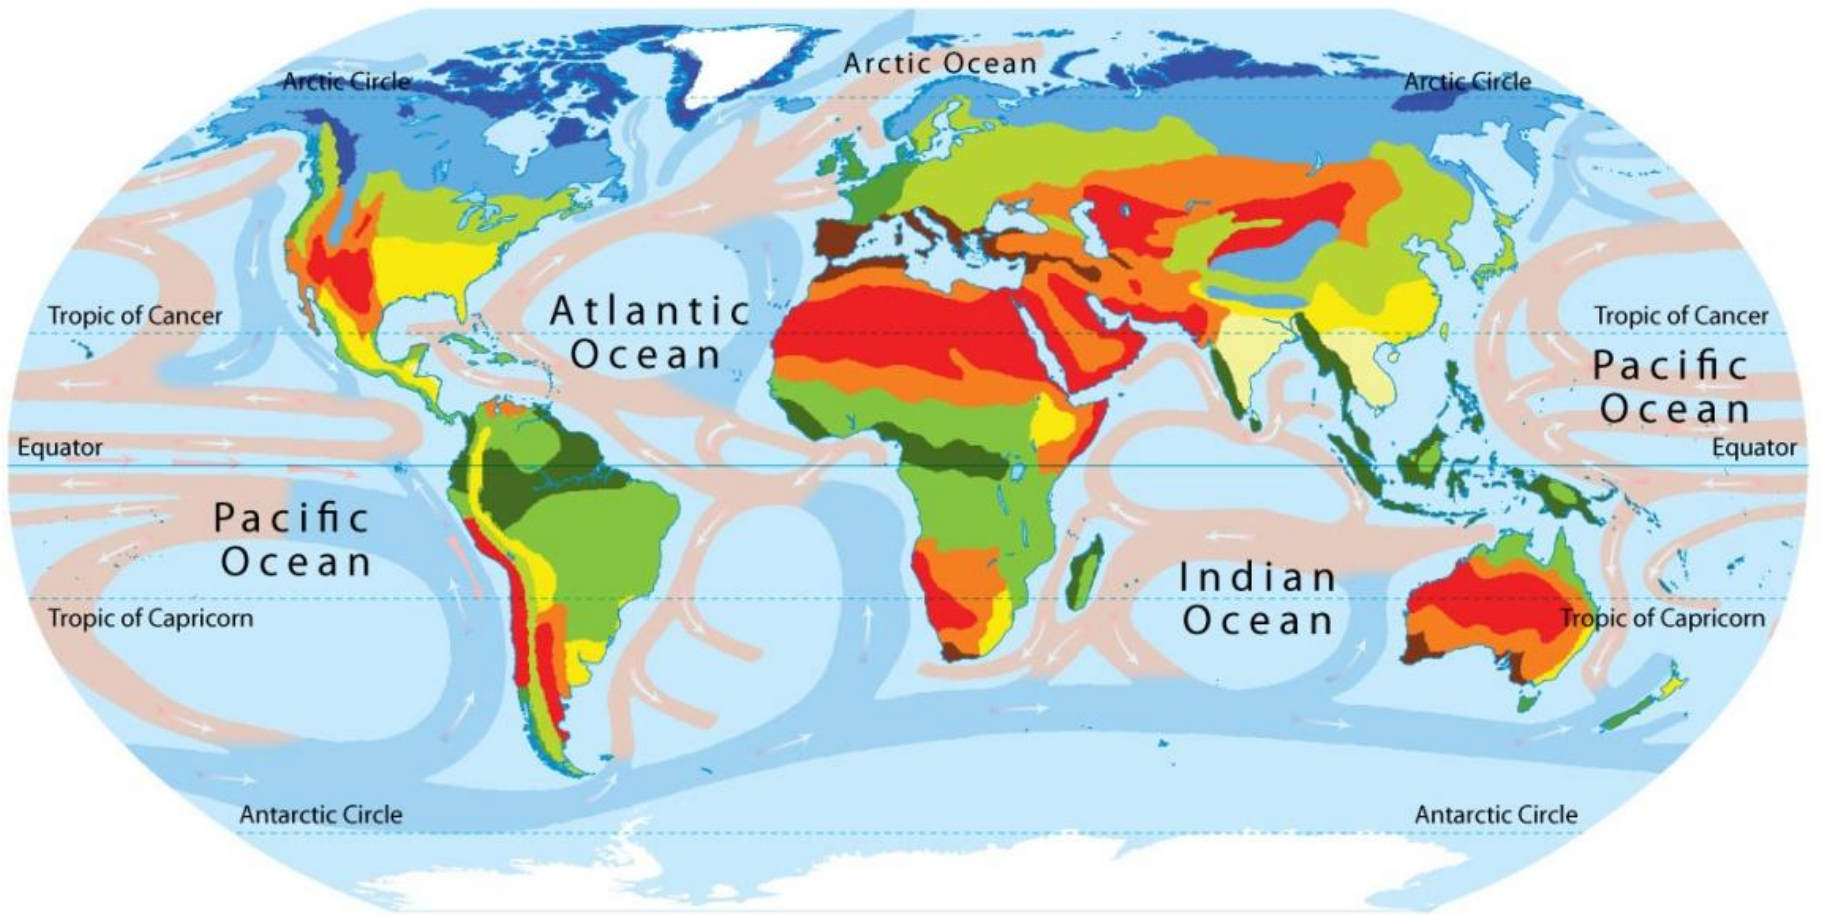

**2 -Conifer Forest**

**3- Warm Desert vegetation**

**4 -No vegetation: snow and ice**

# WORLD OUTLINE MAP

# EXAM COMMENTS

# Midterm Exam Points Recovery Opportunity Directions

Here's how you may recover up to HALF of the points you lost on your Midterm Exam in up to **THREE (3) questions**:

1. **Select up to 3 questions** (multiple choice or write-in) that you got wrong and that you still don't understand very well.

2. For each question explain:

- a) Why you answered as you did
- b) Why your answer(s) were wrong
- c) What the correct answer is, and
- d) Why it is correct (explain in your own words)

**3. For Write-in Questions # 26 -34, do (a) through (d) described above. Note, however, that the point recovery maximum for any one of the Write-In Questions will be a maximum of 3 points.**

**4. Your paper must be TYPED, with your NAME & GROUP # on it, and submitted in hard copy WITH YOUR MIDTERM EXAM to Dr H no later than class time on Mon Nov 9th.**

**No late or emailed papers accepted – must be submitted IN PERSON with a COPY OF YOUR EXAM.**

*[Note that the recovery of half of the points you missed is not "automatic." The number of additional points assigned will be based on how well you demonstrate a thorough understanding of the material in your write-up.]*
